Dear Jonathan

SUBJECT: MCCONNELL DOWELL – TESTIMONIAL TO HOWELL DAVIES

As the Project Manager for MC (APLNG) JV on the Australia Pacific LNG Project I am delighted to provide this testimony for Howell Davies.

Howell Davies partnered with MCJV on the above project, as the Principal Welding Services Provider together with supporting Equipment and operators. This commenced with providing Welders and Trades Assistants for the Qualification Process held in Brisbane and progressed through to site, providing all Personnel & Equipment to undertake the Welding Works for the entirety of the project, of Mainline, Poor Boy, Tie Ins and Facilities.

We were very impressed with the professional approach of Howell Davies to our project, their level of expertise within their field and their ability to provide workable solutions to problems when they arose. Together with their low weld repair rate constant production kept our project on schedule.

Howell Davies possess a thorough understanding of the intricate requirements of this industry, partnering with them provided an experienced resource pool when formulating solutions to issues as they arose.

Having personally dealt with Jonathan Davies, and his team, together with seeing their work first hand on site I would happily recommend Howell Davies as a Principal Welding Services Provider to the Pipeline Industry.

Yours sincerely,

Mark Barrows
Project Manager
